

Large-scale de-reeler

No wire diameter is too large for the Komax ads 123

The Komax ads 123 is a perfect match for the Kappa 240 and allows gentle, quick feed of wire with a diameter up to 35mm.

Marc Huber Product Manager

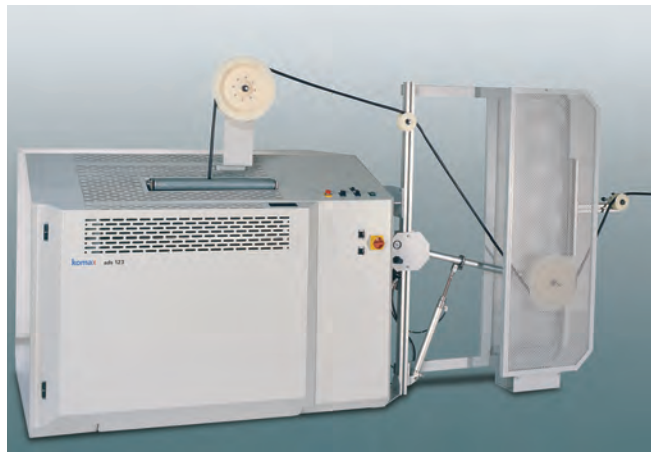

The Komax ads 123 is combined with the optional «linear storage unit» for ideal processing of smaller wire diameters (up to 18mm) at high speeds and with the «storage arm down» option for perfect processing of rigid and larger wire diameters (up to 35mm). The powerful motors handle de-reeling, clamping and lifting of reels weighing as much as 600kg with diameters of up to 1000mm. Thanks to the reel housing and reverse return stop, this system guarantees maximum safety.

YOUR BENEFITS

- Gentle, continuous and low-strain wire feed
- Convenient reel change with motorized lifting and clamping functions
- Allows production without operator
- Full integration in Komax basic machines
- One system – one partner
