Media release

Komax expands offering in India with its own testing company

At the beginning of May 2022 Komax opened its new company Komax Testing India Pvt. Ltd. in Pune, thus increasing its proximity to customers in India's growing testing business. In the process, Komax has taken over the internal testing system production from its Indian customer Dhoot Transmission and integrated it into its new company.

Komax has established a new company, Komax Testing India Pvt. Ltd., in order to increase its proximity to its Indian customers who require testing systems. The newest Komax company, located in Pune, has been in operation since the start of May, and is in the process of gradually ramping up the production of testing systems. Up to now, Komax has been producing systems for its Indian testing customers at its production site in China.

In connection with the establishment of the new company, Komax has taken over the internal testing system production in India from its customer Dhoot Transmission. Komax Testing India thus has employees, who are either new or previously worked for Dhoot Transmission.

"I am delighted that we now operate an Indian production company in addition to our successful, long-standing sales company Komax Automation India," says Matijas Meyer, CEO Komax Group. "In taking this step, we will be able to respond better and more quickly to the needs of our Indian customers and position Komax as a quality supplier in the growing Indian market."
